The persistent myth and **half-truth, which is a whole lie**, continually circulates about Veterans Affairs medical care in Toto being better than or on par with the private sector. That veterans get 'free' health care and other unearned entitlement at taxpayer expense in contrast to what the general public receives, which many civilians envy as unearned privilege. 'The whole lie' about these misnomers is untruth by omission of pertinent facts, which is '***misperception propaganda'*** to rhetorically make VA appear much better that what it is in reality.

First Fact: **The Big Lie**. Adolf Hitler once quipped, " [*When telling a public lie, tell the biggest lie possible, mixed with a grain of truth so that masses will believe it...*]" Ol' Adolf should know for all the 'porkys' he and his Nazi's got away with telling during WW2. Those folks wrote the book "*Effective Mass Lying 101*." **VA PR refined that to a fault.** One pervasive half-truth is that veterans get 'free' healthcare and benefits on par or better than private sector, which is now a commonly believed, persistent, propagandized, *whole lie*. ***Here are historical facts – you figure out the rest.*** During the Clinton Administration, first lady, Hillary Clinton's plan was to sell America on Socialized Healthcare. She needed a sterling Socialized example so chose the VA as her model. Armed with a presidential decree she gave VA an ultimatum: *reform into that sterling model* ***or else***. ***Hillary Clinton needs no introduction: she has sharp teeth and a very nasty bite. However, one has to give that woman credit! She got things done in Washington DC! One woman accomplished what all our representatives in 'The Ship of Fools' US Congress could and still cannot: meaningful VA reforms.*** In 1994, Clinton put Kenneth Kizer in charge of the VA health system, as Undersecretary of Veterans Affairs. The new sheriff over that agency had large teeth and a nasty bite, too. Kizer among his many accomplishments, reformed VA; he modernized the VA's computer systems, fired poor-performing doctors, support staff, and established private-sector-style metrics to measure the VA's performance on things like patient wait times, care quality, service, etc. In other words, during his five-year tenure, ***armed with Oval Office authority, not more and more budget money***, ***Hillary and Kizer*** reformed VA into a top-performing healthcare and benefits institution, which became a jealously envied crown jewel by the US private sector medical industry. Wrested from entrenched, status quo 'good old boy and girl' interests, dead set against them derailing their gravy trains, ***Hillary and Kizer created a long overdue mammoth train wreck from them to provide quality Veteran healthcare and the benefits they earned and deserved for the very first time in VA history.*** However, all good things must end; after Clinton left office and Kizer resigned from VA so did their success story. Recidivism quickly reclaimed the institution to its former free lunch and ride on VA gravy trains for status quo 'good old boy and girl' special interests: VSO's, political pork, crony's, internal corruption, etc. All the while, stealing credit for Clinton and Kizer created successes during the 1994-1999 'VA golden age.' ***In other words, VA propagandized Clinton's and Kizer's accomplishments from over 22 years ago plagiarizing credit for what it did not do.*** *VA is now considered the worst healthcare system in America; while perpetuating commonly believed, lies to the contrary that even ol' Adolf Hitler and his Nazis would envy.* Ref in part to Avik Roy, Forbes Staff writer.

Second Fact: the only good healthcare I received from VA was not from its medical staff. VA cannot hire and/or keep good, competent staff doctors, therapists or nurses. If these people had anything going for them, none would be working at VA. According to civilian medical nurses and doctors that I spoke to about their experiences working there, "listing VA as previous employer on a resume is career suicide except, maybe, when working at an '*ambulance chasing, clap clinic*,' said one vociferous, experienced nurse who was nobody's fool. She worked at five VA hospitals as a job shopper and had very negative experiences to share about them all. On her resume, she listed the contract company that hired her NOT the VA to get around career sinking stigma associated to the agency. The other five doctors and nurses, all said the same as she when considering their experiences working at VA either as temps or residents during medical school.

Why I used VA is very complicated. Over forty years ago after discharge from military, I attempted to use it for benefits that "I earned and deserved" and the whole mess was a sham from the get-go. Like over 90% of all US vets that do not use VA at all, I abandoned it for civilian sector healthcare and other benefits. VA's skewed numbers cite that over 87% of veterans do not use it at all. Then life or death circumstances beyond my control forced me into that nightmare, which is an understatement, from 2017 – 2020. To

condense my experiences of VA-hell-care, the only good medical treatment received during those three years was from contract nurses, doctors, and residents briefly employed to treat veterans. VA claims to be avant-garde in many areas of care. What it does not tell you is that outside medical resources are doing the 'care' not its incompetent medical staff, which is nothing more than desk clerks with, maybe an MD or nursing license. Getting care from one of them is like going to the USPS or DMV for it. They are almost immune from malpractice indemnity so do not suffer consequences for harming, crippling and killing patients. One of the selling points used to attract these people to VA is that employed nurses and doctors do not need malpractice and other insurance, and the bureau is not at all choosy about qualifications. Can you spell doctor and nurse? Bingo, you are hired!! Consequently, qualified medical staff shortage is so acute; VA uses incompetent nurses in place of doctors with fancy titles like NP, APN and PA – nurse practitioner, "A" practicing nurse and physician assistants. In one of the worst personal instances, I underwent over 7 months of primary care NP mistreatment. She could not read lab results well enough to describe them to a patient. I was suffering from severe hypertension and related kidney disease and her Rx was call 911 if you have signs of stroke or heart attack, and then sent me home without treatment. While seeing her, I again qualified to buy affordable medical insurance coverage and VA charged it for services. By law if a vet has it s/he must provide medical insurance policy information to the agency to bill. Cost for each office visit and lab work - over $600.00 charged to my private health insurance. That is the dirty top secret behind three hundred thousand vet deaths during Obama Administration for those kept on secret waiting lists because priority went to paying customers for scarce resources. Is that not rationing? The untreated charity cases that government paid for anyway was money for nothing. 400 hundred billion-tax dollars annually for nothing. Whereas insured customers get priority. Is that not rationing? Her mistreatments forced my return to private sector care; where the cost for an office visit to see a real doctor, treatment and labs was $221.00 charged to my medical insurance plus small co-payments. If I enrolled in a private HMO, such as Humana, co pays are zero for much better care than VA by real, competent doctors! In other words, ***Socialist, government provided substandard medical care costs are almost four times that of the civilian sector.*** That should give pause to anyone about pushing for single payer, government provided, Socialized medical care in America!! People will get far less if anything while paying far more than ever before. Two women veterans who now get all their care under State Medicaid said, " My care by doctors is much easier and better to receive and free to me including drugs because my income allows that benefit. The women's VA was so awful, incompetent and I had to co pay for meds. I had to find something better..." Now people will cite horror stories about private healthcare. Obviously, they are not acquainted with them at VA. For instance and most damning of all is that I have yet to know of a single patient suicide on private clinic or hospital premises protesting bad healthcare! Whereas 24 veterans died by suicide during an 18-month span between 2017-2019 on VA campuses, many self-immolated on premises and off, adjacent to VA property. One did so on a hospital front steps. Self-immolations same as protesters who died on Red and Tiananmen Squares in Russia and China, respectively, in bringing awareness to human abuses in those communist countries. Russia's and China' abuses were nationally broadcast ***in our faces*** by American mass media. Yet, veteran self-immolation, suicides in the USA on government properties was hidden from American public. Bureau staff 'therapists' using psychotic medications and psychiatric abuse during 'therapy' terrorized vets into suicidal psychosis then set the freaked out person loose to finish their *murder by therapy*. Murder is murder regardless of methods used to do it. One hundred vets per day die by suicide from lack of care from VA and America in toto. Private sector abuses pale in contrast to those statistics alone!! If VA, which is a pure Socialist medical and benefits system, had to compete – without legal immunity for its failures and taxpayer financial support - in the private sector **it would totally fail in one month** – then spend years fighting malpractice suits and criminal negligence – reference aforementioned and Clarksburg West Va mass murders by VA hospital medical staff. VA is rightly considered the worst healthcare and benefits system in the entire country. Unless a vet is 100% disabled, nothing there is free at all. Co-payments for drugs and services are often higher than in civilian sector. Out of a 400-billion annual budget, only fifty-cents of every five dollars goes to veteran care. Who and what is getting the rest of it?! You add in fulfilling military duty and associated injuries, plus taxes paid to US treasury and the cost is far more than anyone in civilian sector pays!! I can go on at length about that house of horrors in its inhuman experiments on veteran human

animals, plus now on dogs and cats while claiming to be an *award winning* healthcare system. Perhaps the Dr. Mengele, aka Dr. Death Award? If veteran welfare were core concern to Americans, Veterans Affairs Dept would not exist. We would all be in the private sector getting genuine help same as civilians not as prisoners in the worst HCS existing in the nation that we served. Just remember, ***when VA claims to do all these "wonderful" things for us, all of that "breathtaking" care comes from civilian healthcare resources purchased by the US government with tax dollars!*** Otherwise, their claims are blatant, bald-faced, PR spun - lies. Moreover, nearly all actual veteran care taking comes from outside the bureau from family, spouses, friends, 'good Samaritan' strangers, Social Security and other ***private*** disability systems, State resources, public and private HCS, insurance companies and at the very least 1000's of veterans charities operating on shoestring budgets – **NOT VA** operating with hundreds of billions of taxpayer and private healthcare dollars from insurance billing**!** ***I cannot understand why the private healthcare industry is not screaming to the moon that a government run Socialist HMO also can competitively bill private insurance in addition to tax subsidies that every private medial employee and institution pays in taxes!!*** Then the worst government run Socialist HMO simply plagiarizes credit for what it does not and never did do as cover up. Think about those facts; I can prove them all; although with a little effort you can find them publicly posted everywhere. Google 'VA abuses, scandals and 'VA sucks' sites' while they exist, censorship removes them in paving the way for selling Socialized medical care to USA. Web pages never go away. Sites of archived web pages still have the censored information available but one has to dig for it. However, the best source is talk to veterans undergoing or who have undergone VA experiences. Mass media would have you fear and avoid us so that nobody will ask to learn the truth. But for uncle Tim and Tom, propaganda spewing shills and toadies, vets will give it to you brutally, ugly and – straight. Barring that, research "veteran suicide epidemic," homelessness, legal troubles ad infinitum. All of it is out there for truth seekers. Honest facts exist everywhere. Nothing is better than personal experiences, though. Truth cannot be hidden and knowledge of it will set you free...

VA is cause of the veteran suicide epidemic in America. Always has been and unless something drastic changes will remain so. When a new vet enters or existing veteran reenters that system if any mention of emotional or mental health issues exists in his or her service records, the agency immediately drugs the person insane. I know a vet that went berserk and told them that '***these drugs*** *make me want to kill somebody,*' while looking at VA prescribing staff. They immediately tapered him off when their sorry necks were in danger. ***However, had he instead said 'I want to kill me,' then prescriber's up the drugs & dosage and mentally terrorize that troubled vet in back office 'therapy' until s/he suicides.*** I underwent the latter and lived to write about it. Veterans it only takes once to end up in a morgue wearing only a toe tag or to be crippled for life by one of these butchering quacks. Caveat Emptor. VA is responsible for $99^{-9/10's}$ of all veteran suicides! Currently the agencies post hoc & red herring is that it's not responsible for ***'all'*** vet suicides, which is a weasel statement admitting guilt. 100 veteran suicides per day cannot be wrong. Using its skewed, cooked book numbers over 60,000 US veterans died by suicide in a ten year period from 2008-2017, which is beyond absurd. Only one is too many. The point is US Dept of Veterans Affairs owns every single one of them!!! *An inconvenient truth that you own, in Toto,* ***America*****.** If you buy into Socialized healthcare; not only do you own it, the truth will curse your life and that of your loved ones forevermore.

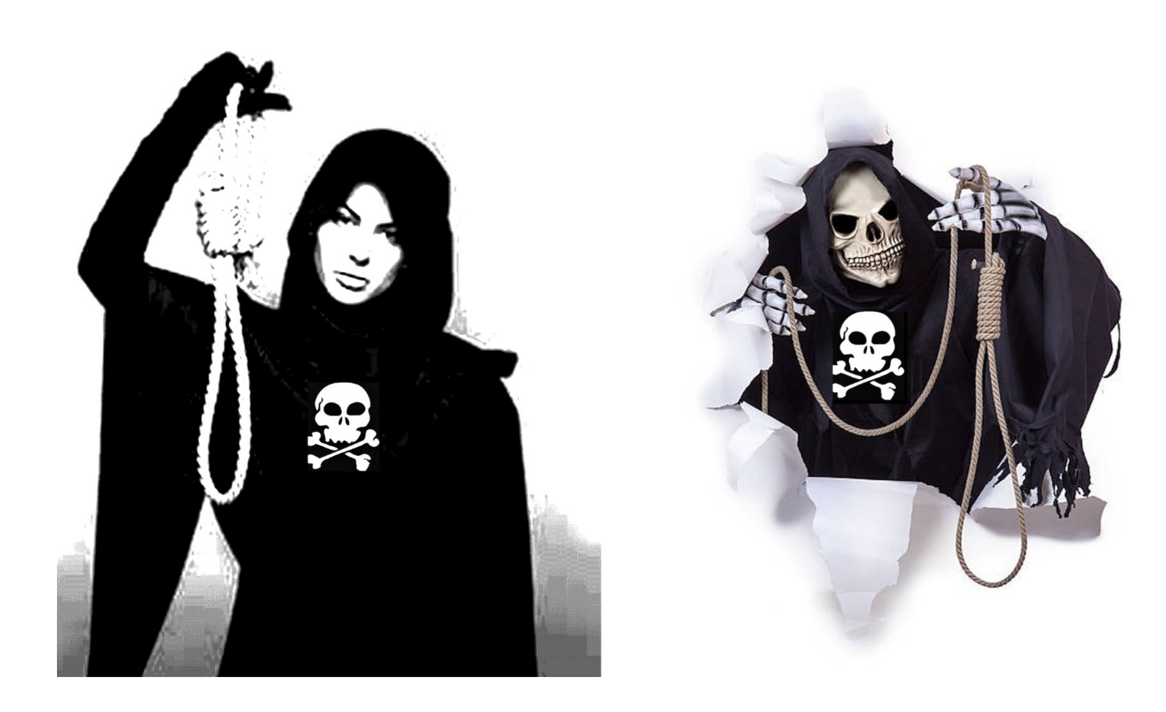

VA SUICIDE PREVENTION AND TREATMENT PROGRAMS.

WHEN REQUESTING

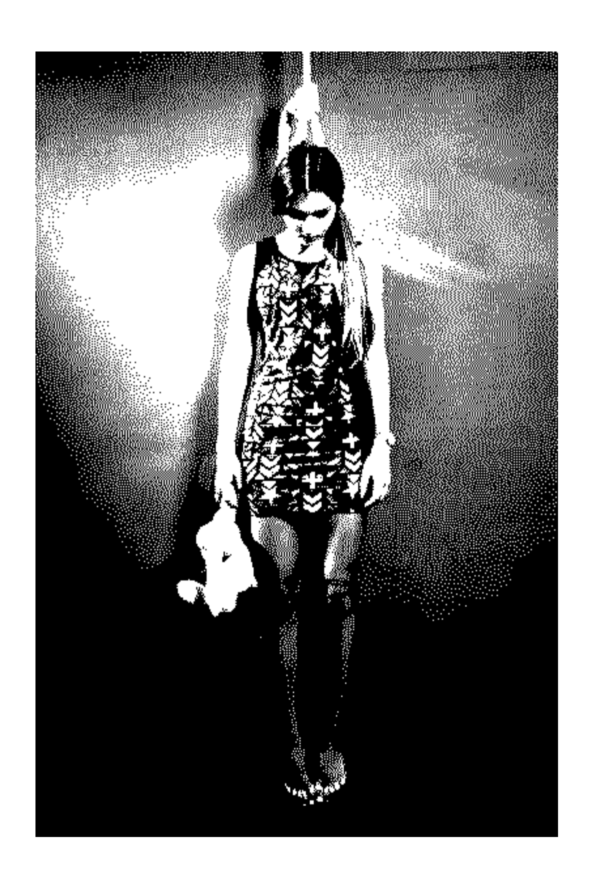

VA PRESCRIBED A NOOSE

VA's SUICIDE PROBLEM MIGHT BE RESOLVED

BUT NOT FOR HER

V A and America refused her help.
So, this Veteran died alone with only a teddy bear as comfort.

Only America and VA can stoop this low profiteering from veteran suffering and suicides.

Military and Veteran SUICIDE
is no joke.

Brought to you by VA murdering US veterans to
Make America Great Again.

The Girl Child

"I come and stand at every door
But none can hear my silent tread
I knock and yet remain unseen
For I am dead, for I am dead

I'm only seven though I died
In Hiroshima long ago
[My sister died in Nagasaki]
I'm seven now as I was then
When children die they do not grow

My hair was scorched by swirling flame
My eyes grew dim my eyes grew blind
Death came and turned my bones to dust
And that was scattered by the wind

I need no fruit I need no rice
I need no sweets nor even bread
I ask for nothing for myself
For I am dead, for I am dead

All that I need is that for peace

You fight today, you fight today
So that the children of this world
Can live and grow and laugh and play?
For I am dead, for I am dead –
Hell is for children.

The Girl Child" ~ Nazim Hitmet –

Americans live in a fantasy about military and WAR! Their myopic, narrow idealisms are archaic to before the 19th century! The Neo-war age is now psychological and biological warfare. Of mind and microbe. Evidenced today by Covid; Americans move as blood spooked herds fearful of an invisible, undetectable danger lurking everywhere! A virus, against which they wear useless anti–microbial masks in self-defense, obsessed by sanitation, evading each other, and worse! If the Homo Sapiens race does not evolve out of the current anal-retentive, evolutionary stage of **W**e-**A**re-**R**ight and promptly, it will self-extinct the taxon back to 1 million BC for another try at re-evolving, again, taking all of its born and unborn children, grand and great grand kids with it. Want proof? The US 'Native American' and Nazi Germany 'Jewish' Holocausts and final solutions reset the clock on humanity 50,000 years into the past! ***Aforewritten atrocities are clear evidence of what the human animal is capable of doing to its kind; Hiroshima and Nagasaki atomic bombing of civilian cities – innocent men, women and babies, clearly shows what is at stake for humanity: self-extinction in toto***. America worships Einstein as father of nuclear war. America experimentally used those doomsday weapons or WMD's on unarmed, non-military civilian targets, crippling and killing innocent men, women, children, babies and their descendants for decades to come declaring it an act of war ***before Japan could get to peace tables***. Human animal experiments...kinda makes one proud to be an American....humans, dogs and cats never had a chance in this circus.
